ORGANISATION STRUCTURE

Job Description

We currently have an opportunity for a Technical Supervisor to join our team. This is a great opportunity for a customer focused individual to join a world leading food and facilities management company that provides the IFM site service delivery within a large industrial / commercial site. Whilst offering unrivalled opportunities for career progression.

Main Responsibilities

- To co-ordinate and direct all activities within the assigned area across hard FM service.
- To ensure that all services provided, adhere to safe systems at work and all relevant legislative requirements, supported by Centre of Excellence, Technical Service Manager and Shared Services.
- The delivery of activities as stipulated in any local Account Strategies.
- The monitoring of the services delivered and the reporting of said services to the Engineering Manager.
- To act upon any reasonable requests from Managers.
- To be accountable for the effective delivery of a professional maintenance service to the client ensuring that all contractual response and repair times are met.
- Liaising with and organising other operatives/contractors to ensure a consistent and professional approach and having familiarity with electrical and mechanical systems with the ability to carry out minor repairs associated with said systems.
- To manage, update and amend the site Asset register as and when required as per LOP.
- To manage/assign and close work orders with the CAFM system with the assistance of the Site Service Support Administrator as per LOP.
- To organise the teams work-load to achieve KPIs.
- To be appointed to any relevant AP role upon successful completion of the Safe Systems of Work course and subsequent formal assessment. Responsibilities there-after to be the management of the said SSW(s).
- To issue Permits to Work within competencies and remit.
- To co-operate with the client and employer ensuring that all statutory Health, Safety and Welfare legislation, is adhered to, including any company or site-specific policies and rules.
- To be part of the on-call rota for breakdown callouts across the site over a routine 7-day period.
- To be prepared to work to variable hours Monday – Friday when required based on a 40-hour week.
- To provide assistance to other operatives and contractors when required.
- Be able to communicate with the client's staff at all levels.
- To attend any other training courses as required.

Key Performance Indicators (KPIs)

- Complete all work orders as per contractual KPI
- Labour productivity management
- Client satisfaction
- Client Retention
- Unit audit scores
- People Management
- Internal compliance standards
- Health & Safety Compliance
